

TIPS & TRICKS of Journal Selection

TRI INDAH WINARNI, MD, PhD
FACULTY OF MEDICINE
DIPONEGORO UNIVERSITY
Semarang, September 5th 2021

Scientific atmosphere in Indonesia

- Publishing a work is (personal & institution) demanding
- **Digital era:** almost all journal are publish online using online → submission central with tracking system → transparency process & **no boundaries**
- **SINTA** (Science and Technology Index): **web based** information system to measure performance of researcher/institution and journal in Indonesia (**accreditation OR indexing system**)
- **GARUDA** (Garda Rujukan Digital): Indonesian scientific reference portal, an access point for scientific works produce by Indonesian researchers → **search where to publish in Indonesian journal**

8 Reasons Why Journals Reject Manuscripts

Check out these top reasons for manuscript rejection and make sure you avoid them when submitting your next paper to the journal.

Wiley & Co

an American multinational publishing company founded in 1807 that focuses on academic publishing and instructional materials

WHAT GOES WRONG

WHAT YOU SHOULD DO

Mismatch with the journal's scope

1

Find a suitable target journal for your manuscript!

Lack of originality, novelty, or significance

2

Ensure your results are generalizable and/or have practical, clinical, or theoretical implications

Flaws in study design, poorly formulated research question

3

Do a thorough literature review to choose the best research methodology

Poor writing and organization

4

Follow the IMRAD format to prepare a well-structured manuscript

Impact to solve a problem?

Methods: does it sound logical?

WHAT GOES WRONG

WHAT YOU SHOULD DO

Language and spelling issues

5

Avoid jargon, write simply and clearly, run a spell check

Poorly presented visual elements

6

Ensure the figures, tables, images, and graphs are accurate and clearly labelled

Unintentional ethical issues, e.g., plagiarism

7

Avoid plagiarism - follow all ethical publishing guidelines

Lack of adherence to journal submission guidelines

8

Read, understand, and follow ALL manuscript submission guidelines

When English is not our 1st language → Proofreading

Table and Figure

TIPs Choosing a journal

- High-impact work can be rejected when the topic of the research does not match **the scope of the journal**, and making this mistake **wastes time, money, and motivation**
- Has the journal published articles that are **similar to yours?**
- What are the journal's **restrictions?**
 - the journal accepts papers no longer than 4000 words
 - do not publish case report/letter/review
- What is the journal's **reputation?**
 - Akreditasi Jurnal Nasional (ARJUNA) rank by **SINTA**
 - Impact Factor/IF by **Clarivate**
 - Scimago Journal Rank/SJR by **Scopus**

How to select a journal

1. National Reputable Journal (SINTA)

<http://garuda.ristekbrin.go.id/area>

2. International Reputable Journal

1. **Scopus indexed** → www.scopus.com/

2. **Web of Science (WoS)** → <http://mjl.clarivate.com/>

3. **Includes:** the Science Citation Index Expanded™ (SCIE), Social Sciences Citation Index™ (SSCI), Arts & Humanities Citation Index™ (AHCI)

Emerging Sources Citation Index™ (ESCI) → **is not included**

NATIONAL REPUTABLE JOURNAL

- <http://garuda.ristekbrin.go.id/area>
- Choose the subject area
- Choose the journal
- Find out the **reputation of journal (SINTA)**
- Read journal identity (publisher, ISSN, **Focus and Scope**)
- Frequency: Monthly, bimonthly, twice, etc
- Read **author guidelines** and submission check list from journal website

Scimago Journal Finder:

<https://www.scimagojr.com/> → <https://www.scopus.com/>

The image shows a screenshot of the Scimago Journal & Country Rank website. At the top, there is a dark blue banner with the title 'Scimago Journal Finder:' and a link to the website. Below this, the website's header is visible, including navigation links for 'Journal Rankings', 'Country Rankings', 'Viz Tools', 'Help', and 'About Us'. The main content area features a large orange header with the 'SJR' logo and the text 'Scimago Journal & Country Rank'. A search bar is present with the placeholder text 'Enter Journal Title, ISSN or Publisher Name'. Below the search bar, there is a section titled 'WHAT IS SCIMAGOJR FOR?' with several filter buttons: 'All subject areas', 'All subject categories', 'All regions / countries', 'All types', and '2019'. At the bottom, there are checkboxes for 'Only Open Access Journals', 'Only SciELO Journals', and 'Only WoS Journals', along with a field for 'Display journals with at least 0 Citable Docs. (3years)'.

Aims and Scope

An international journal devoted to the science of the cerebellum and its role in ataxia and other medical disorders. There is currently intense interest in the genetics of cerebellar ataxias and in the roles of the cerebellum in motor control and cognitive functioning. This region contains more neurons than all the other structures of the brain. As a result of the ageing population, diseases associated with cerebellar dysfunction are becoming more widespread.

Additional information you may need

American Journal of Medical Genetics Part A

The American Journal of Medical Genetics - Part A (AJMG) gives you continuous coverage of all biological and medical aspects of genetic disorders and birth defects, as well as in-depth documentation of phenotype analysis within the current context of genotype/phenotype correlations. In addition to Part A, AJMG also publishes two other parts: *Part B: Neuropsychiatric Genetics, covering experimental and clinical investigations of the genetic mechanisms underlying neurologic and psychiatric disorders. *Part C: Seminars in Medical Genetics, guest-edited collections of thematic reviews of topical interest to the readership of AJMG. As a crucial resource to physicians, medical geneticists and associated professionals, the Journal's primary purpose is to report original research in the following areas: *Biochemical Genetics: newborn screening, carrier detection, and the metabolic dysplasia and malformation syndromes; *Cancer Genetics and Cancer Cytogenetics: experimental and molecular approaches; *Clinical Genetics: descriptions of new syndromes, new causal and pathogenetic insights into known syndromes, advances in genetic counseling, nosology, anthropometry, and anthropology, including dermatoglyphics; *Clinical Molecular Genetics: linkage, mapping, and gene sequencing; *Formal Genetics: quantitative, population, and epidemiological genetics; *Molecular Cytogenetics: delineation of syndromes due to chromosomal aberration; *Neuropsychiatric Genetics: reports on novel research on the genetic mechanisms underlying psychiatric and neurological disorders; *Reproductive Genetics: prenatal diagnosis and the genetics of prenatal and perinatal death in humans.

[-] **Anxiety, attention problems, hyperactivity, and the Aberrant Behavior Checklist in fragile X syndrome.**

Published 2014 - Jan

Behavior problems are a common challenge for individuals with fragile X syndrome (FXS) and constitute the primary clinical outcome domain in trials testing new FXS medications. However, little is known about the relationship between caregiver-reported behavior problems and co-occurring conditions such as anxiety and attention problems. In this study, 350 caregivers, each with at least one son or daughter with full-mutation FXS, rated one of their children with FXS using the Aberrant Behavior Checklist-Community Version (ABC-C); the Anxiety subscale of the Anxiety, Depression, and Mood Scale; and the Attention/Hyperactivity Items from the Symptom Inventories. In addition to examining family consequences of these behaviors, this study also sought to replicate psychometric findings for the ABC-C in FXS, to provide greater confidence for its use in clinical trials with this population. Psychometric properties and baseline ratings of problem behavior were consistent with other recent studies, further establishing the profile of problem behavior in FXS. Cross-sectional analyses suggest that selected dimensions of problem behavior, anxiety, and hyperactivity are age related; thus, age should serve as an important control in any studies of problem behavior in FXS. Measures of anxiety, attention, and hyperactivity were highly associated with behavior problems, suggesting that these factors at least coincide with problem behavior. However, these problems generally did not add substantially to variance in caregiver burden predicted by elevated behavior problems. The results provide further evidence of the incidence of problem behaviors and co-occurring conditions in FXS and the impact of these behaviors on the family.
